CLINICAL AND RADIOGRAFIC EXAMS REPORT

CLINICAL EXAM

NAME OF THE HORSE : I'm very Special

SIRE N°:

MICROCHIP N° 276020000662613

DATE OF BIRTH : 10 April 2018

Sex : Female stallion Gelding
Testis : none Abnormalities No Abnormalities

Build and posture – Good moderate Bad
Body conditions :

Jugular vein : normal deviant :

Mouth exam : Normal deviant Remark :

Piroplasmosis Test /babesia/Theileria : test type: Results: NOT ACHIEVED

Uptodate vaccination: FLU EHV 1, 4 TET

Respiration and cardiac exam before training :

Heart : Normal Abnormal Remark :
Respiration : Normal Abnormal Remark :

EYES EXAMS

Cornée : Normal Abnormal Remark :
Anterior chamber - iris - lens: Normal Abnormal.
Remark :

SKIN AND HAIR : Abnormalities

Pruritus sign : No Yes Remark :

Sarcoïd : No Yes Remark :

Tail and hair problem : No Yes Remark :

Skin marks : No Yes Remark :

Angular deviation, Hoof, muscular exam :

Angular limb : Normaux Abnormal Remark :

Hoof size : equal LF>RF or RF>LF Remark :

Pelvis: Symmetric Asymmetric Remark:

Muscular atrophy : No yes Remark:

LOCOMOTION EXAM :

Straight line WALK hard surface : Normal Abnormal Remarks :

« 8 » at walk : Normal Abnormal Remarks:

Straight line TROT hard surface: Normal Abnormal Remarks:

Trot: circle left and right soft surface : Normal Abnormal Remarks:

Canter: Circle left and right soft surface : Normal Abnormal Remarks:

Trot: circle left and right hard surface: Normal Abnormal Remarks:

Coordination abnormality (nervous system): No Suspect Yes

Dynamic flexion test (RF/LF/HR/HL): Negativ Positiv :

Remarks :

RESPIRATION, HEART EXAM DURING and AFTER LABOUR :

Heart : Normal Abnormal Remarks :

Respiration : Normal Abnormal Remarks :

Additional Noise : yes. No. Remarks :

Cough : Yes No Remarks :

REMARKS :

CONCLUSION OF CLINICAL and RADIOGRAFIC EXAMS

Following the examinations carried out today, our findings regarding the health status of this horse with a view to its intended future use are as follows:

0 - Absence of clinical anomaly or lesion incompatible with intended use.

1 - Presence of minor abnormality, frequently encountered in horses performing well in the discipline envisaged.

2 - Presence of clinical abnormality or lesions that may be encountered on horses performing well in the discipline envisaged, the management of which requires appropriate medical and/or surgical care and/or shoeing

3 - Presence of clinical abnormality or lesions likely to compromise the horse's future use.
